

COMPANY OVERVIEW

COACT, Inc. is a Service-Disabled Veteran Owned Small Business (SDVOSB) and an accredited FedRAMP Third-Party Assessment Organization (3PAO). For over 25 years, COACT has provided consulting, Independent Verification and Validation (IV&V), engineering and compliance support services to government and commercial clients to guide them in understanding and fulfilling their security and risk management needs. COACT is dedicated to delivering services that meet our customers' needs and exceed their expectations by incorporating knowledge of best practices, understanding of compliance requirements, and quality assurance concepts. We are results-driven and focused on supporting and enhancing the security and compliance strategies of our customers by leveraging our high standard of ethics and integrity.

WHY CHOOSE US?

COACT provides advisory, program management, compliance support, risk management, and monitoring services to both government and commercial clients. Our expertise extends beyond our technical ability to implement and evaluate security using best practices and an established quality system. The use of our accredited quality system and proven workflow processes reinforces our commitment to the compliance of our customers via continuous improvement and standardized services.

CORPORATE SERVICE OFFERINGS

CYBER SECURITY COMPLIANCE

Advisory Strategic Planning, Boundary Scoping, Continuous Monitoring, Authorization Package Development, Risk Management, Vulnerability Assessment, Security Assessments, Risk Reporting, Disaster Recovery, Remediation Support, Documentation Development and Maintenance.

PROGRAM MANAGEMENT

Strategic management support to civilian Agencies, Department of Defense, and commercial organizations providing help desk support, technology maturity assessments, project management support, alignment and traceability of new and existing security requirements.

PROCESS IMPROVEMENT

Apply security engineering principles and industry best practices to support the transformation of individual services and security programs to maximize security and compliance benefit. Recommend technological changes and introduce new processes to improve customer enterprises and systems.

SECURITY ENGINEERING

Deliver realistic solutions to enhance the security posture of customer organizations by designing and implementing compliant systems and services. Ensure information and information systems are adequately protected and adhere to existing laws, regulations, directives, and policies.

LABORATORY IV&V

Advisory services include documentation development and validation readiness assessments. We have performed over 120 FIPS 140-2 validations for cryptographic technologies and modules and Security Content Automation Protocol (SCAP) compliance testing on multiple platforms for all capabilities and standards.

COACT, Inc. uses its Quality Management System and innovative workflow processes to help multiple Cloud Service Providers (CSPs) architect and configure FedRAMP-compliant cloud service offerings ahead of schedule and reduce costs associated with security implementation and documentation. CSPs that partner with COACT for consulting and advisory services offer their solutions to various private- and public-sector organizations including government agencies and commercial businesses. COACT analysts utilized a proprietary boundary scoping methodology and formalized documentation development process to prepare the following CSPs for a FedRAMP assessment and meet compliance requirements.

Accredited: COACT is accredited as a FedRAMP 3PAO by A2LA. As an accredited assessment organization, COACT can help your organization identify vulnerabilities, understand risks, and optimize your information security program.

Assessment Team: COACT utilizes a staff of technically proficient assessors that demonstrate their knowledge and skills during an annual Baltimore Cyber Range evaluations. Our personnel also maintain multiple industry certifications and participate in specialized training courses each year.

Quality Assurance: The accredited Quality Management System used by the assessment team incorporates Quality Assurance work products and processes during the performance of each assessment. Results and evidence are validated and accurate.

Boundary Scoping: COACT developed a proprietary boundary scoping methodology that can be leveraged by both government and commercial organizations to reduce costs and increase situational awareness. Assessors ensure the appropriate boundary is defined for each system and responsible parties are aware of the security status of their organizational assets.

COACT LABORATORY

Our accredited FIPS 140-2 and SCAP validation laboratory works with multiple vendors of cryptographic technologies and scanning solutions to verify their products meet applicable requirements. Laboratory personnel provide advisory and testing services to our customers to support the timely and cost-effective development of each product in preparation for release. Our state-of-the-art laboratory ensure that testing activities are performed precisely, and evidence is generated to satisfactorily support the validation of each tested product.

CERTIFICATIONS

COACT personnel maintain multiple industry certifications that contribute to the technical knowledge base of the company and bolster the skills of the individuals that perform assessments and provide advisory services. The certifications that our personnel maintain include: CAP, CISSP, CNDA, CEH, MCP, LPT, PMP, RHCT, CTT+.
