

COACT

SECURITY SERVICES CAPABILITIES

Security Compliance and Consulting

COACT tiered service offerings range from focused efforts to address specific security objectives, to providing full information security programs in commercial, regulatory, defense, and intelligence domains.

COACT provides customers with information security programs that include documentation development services in addition to independent security assessments of information systems. The frameworks and compliance programs that our services can address include:

FedRAMP

FISMA

NIST SP 800-171

LADMF

CJIS

DIACAP to DoD RMF

FedRAMP

FedRAMP is a government-wide program that provides a standardized approach for assessing, authorizing, and continuously monitoring cloud solutions and services.

COACT is an accredited FedRAMP Third Party Assessment Organization (3PAO) that provides FedRAMP consulting and assessment services for cloud service providers.

FISMA

Federal agencies and contractors operating information systems on behalf of the government are required to implement and continuously monitor security controls in accordance with FISMA.

COACT provides consulting and assessment services to assist organizations in the implementation of security, evaluation of risks, and remediation of vulnerabilities.

NIST SP 800-171 (DFARS/FAR)

NIST SP 800-171 prescribes security requirements for Federal agencies to safeguard Controlled Unclassified Information (CUI) that resides outside of agency control. FAR 52.204-21 and DFARS 252.204-7012 require contractors to ensure the security and confidentiality of CUI and Covered Defense Information (CDI).

COACT can reduce the time and resources needed to demonstrate compliance.

LADMF

The National Technical Information Service (NTIS) requires that Subscribers of the Limited Access Death Master File (LADMF) protect that information in accordance with guidance provided in LADMF Certification Program Publication 100.

COACT is an Accredited Conformity Assessment Body (ACAB) that can assist Subscribers in demonstrating compliance.

CJIS

There are minimum security requirements to which Criminal Justice Agencies (CJA) and Noncriminal Justice Agencies (NCJA) must adhere to access FBI Criminal Justice Information Services (CJIS) systems and information.

COACT is an accredited assessment organization that can provide documentation development and assessment services to organizations that must comply with the CJIS Security Policy.

DIACAP to DoD RMF

The transition from DIACAP is mandated by the new revision of DoD Instruction 8510.01. COACT has demonstrated a vast understanding of the Risk Management Framework (RMF) through the development of information security programs and the execution of multiple assessments of Federal and commercial information systems.

COACT can assist DoD clients in the transition from DIACAP to DoD RMF.

COACT, Inc. is a Service Disabled Veteran Owned Small Business (SDVOSB) and an accredited FedRAMP Third Party Assessment Organization (3PAO), which was founded in 1990. For over 25 years, COACT has been providing consulting, Independent Verification and Validation (IV&V), and documentation development services to both government and commercial clients to guide them in understanding and fulfilling their risk management and compliance needs.

MAKE DECISIONS WITH IMPACT

Why Choose COACT?

When you choose COACT, you receive far more than consulting and assessment services; you gain a true partner with a vested interest in the success of the establishment and testing of your information security program, system, or application. Our role is providing a means for your organization to meet your mission/business needs and we accomplish that by providing value beyond our competitive pricing. Our goal is to evaluate your program or system ahead of schedule and within budget, and improve your overall security posture.

Since 2001, COACT has provided advisory and risk management services to government and commercial clients alike. Our expertise extends beyond our technical ability to evaluate information systems using proven assessment practices and an established quality system. The use of our accredited quality system and proven workflow process reinforces our commitment to the compliance requirements of our customers through continuous improvement and standardized processes. Through each engagement, COACT ensures that we adapt to your business needs, which results in a truly synergistic relationship with our clients.

Contact our security analysts to see how COACT can provide risk management services to your company by leveraging our expertise and processes to reduce the time and financial costs needed to achieve compliance.

COACT METHODOLOGY

SCOPING

COACT evaluates the security posture of information systems and security programs subject to regulatory compliance. Activities focus on documentation development and review, definition of system boundary, and evaluation of policies, procedures, and security

REQUIREMENTS

COACT ensures that organizations implement safeguards and document implementations to satisfy the security requirements defined in the respective framework. Our requirements traceability process ensures the appropriate controls are implemented.

ASSESSMENT

COACT assesses the implementation of security controls to demonstrate that systems, facilities, and procedures are in place to safeguard information consistent with the security guidelines and requirements defined in the respective framework.

MONITOR

COACT ensures that organizations meet monitoring requirements associated with the respective framework by developing a strategy to assess security safeguards and continuously evaluate control effectiveness.
